Integration**

State Of the Art Technology For The Circular Economy

We deliver a sustainable and technology-smart solution to your needs.

We embed intelligence at device level, eliminating the need for control cabinets and control wiring generating savings of up to 94% on materials.

We use the latest wireless mesh technology from Bluetooth eliminating up to 60% of the installation costs.

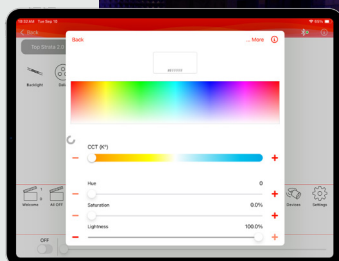

Delivering Wellbeing

Quality of sleep rate is at the top of client's priorities. BubblyNet addresses lighting, temperature, air quality and noise for a holistic approach to customer satisfaction.

Delivering Memorable Experiences

Smart Lighting can adjust based on the time of the day and the occasion. Architectural and entertainment lighting seamlessly integrate contributing to extraordinary spaces

Customize lighting scenes from a mobile device for their unique effect.

Taking Guestrooms To The Ultimate In Comfort And Sophistication

With intelligent guestroom control, light, shade and climate deliver personalized ambiance automatically adjusted based on the time of the day and occupancy.

Motorized Shades Integration

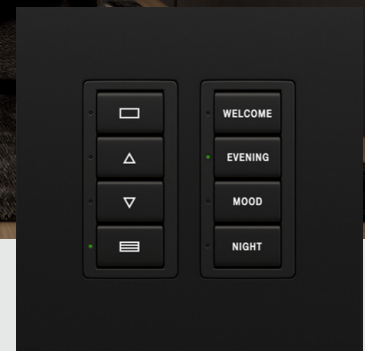

Occupancy / Vacancy

Touchscreen

Do Not Disturb

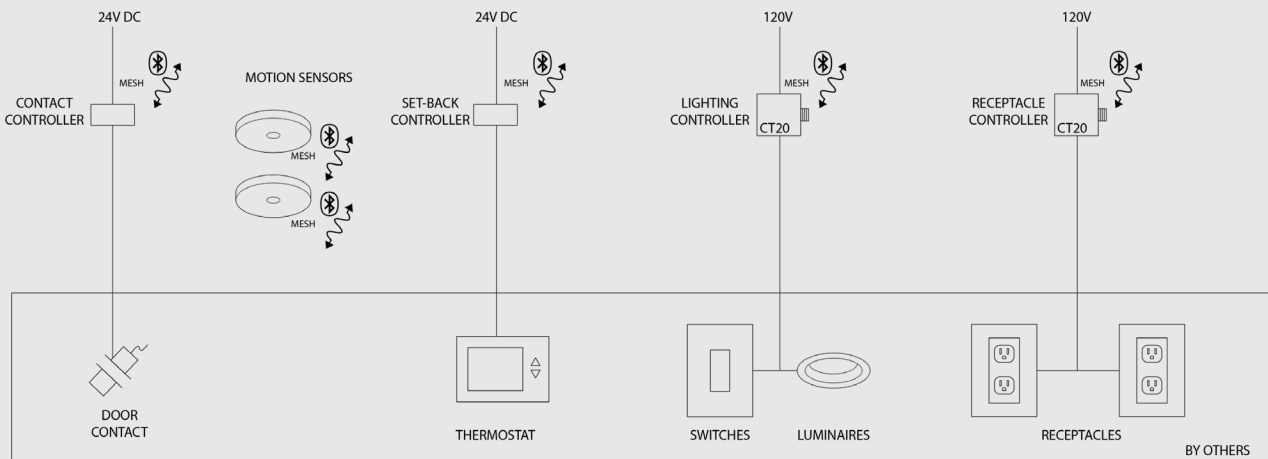

Custom Switch

Controlling the room ambiance has never been easier.

Supporting Your Journey To Net Zero

Guestroom In A Box

Wireless devices factory pre-programmed in a kit make the upgrade of guestrooms a breeze. Electrical contractor can get in and out of the guestroom in a short time, reducing disruption of the property's operations to the minimum.

All-In-One Networked System

More sustainability options available within the all-in-one BubblyNet Network Platform:

- Do Not Disturb (DND) door system
- Keycard Switch
- Motorized Shades
- Wireless Receptacles
- Guestroom Touchscreens
- HVAC Integration
- Audio / Video Integration
- Cloud Connectivity

Delivering A Future Proof Platform

BubblyNet platform continues to upgrade to the latest wireless technology including Bluetooth® Mesh (2017) and Bluetooth® NLC (2023).

Cloud Dashboard and website app automatically update over the air to the latest security protocol and expanded functionalities.

Resilience

Our premises network is fully operational without wifi and switches, touchscreens and mobile devices are operational even without an internet connection.
