Connectivity

Devices are repeaters for other devices and should be installed within a certain maximum distance from each other.

Battery powered devices do not replay messages and are not counted when establishing Mesh continuity.

Typical maximum distance:

Outdoor (line of sight): 200ft

Indoor (through building material):

Glass:	100ft
Drywall:	70ft
Cinderblock:	60ft
Brick:	50ft
Concrete + rebar	0ft

For design purposes a 60ft. maximum distance is appropriate for most installations.

Specifications

- Dimensions - Diameter 0.98 (25mm)
Length 0.72" (18mm)
- Color - Brushed Stainless
- Push-button function
- Communicates with other Bluetooth Mesh Devices
- RGB Indication for Do Not Disturb (DND)

Sequence of Operation Options

Do Not Disturb (DND)

- Guest in the room can press the DND key to illuminate the RED DND indicator located outside the room.
